

Kindergarten:

- Count everyday objects around the house (toys, cars, plates or glasses on the table, etc.)
Put the groups of objects in order from least to greatest.
- Have your child make numbers from 2 to 10 multiple ways using 2 groups. For example, they could show 6 Cheerios with groups of 2 and 4, 3 and 3, and 5 and 1. Have your child tell you the addition sentence. "2 and 4 is/makes 6"
- Talk about real world number stories. "If you have 3 apples and your brother ate one, how many will you have left".
- Play Dominos. Have your child add the two parts and say the total each time they play a domino. Challenge your child to make a subtraction fact for the domino they play!
